Summary

AI/ML Engineer with hands-on experience building Generative AI, RAG, and agentic applications using Python and FastAPI. Experienced in developing REST APIs, multi-agent workflows, vector search systems, and LLM-powered applications using LangGraph, LangChain, PostgreSQL, FAISS, and ChromaDB. Strong backend and deployment skills with authentication, Git, Docker, and CI/CD, with a focus on building production-oriented AI systems.

Education

B.E. in Artificial Intelligence & Machine Learning 2022 – 2026
ISBM College of Engineering, Pune CGPA- 8.11/10

Professional Experience

AI/ML Engineer Intern April 2026 – Present
Visionary Strategic Partner LLP, Pune

- Develop AI-powered applications using Python, FastAPI, and Large Language Models (LLMs) for real-world automation workflows.
- Build and integrate REST APIs and backend services for production-oriented AI applications using Python and FastAPI.
- Implement Retrieval-Augmented Generation (RAG) pipelines using LangChain, LangGraph, and vector databases to deliver grounded LLM responses.

Technical Skills

Programming: Python, SQL
Generative AI / Agentic AI: LangGraph, LangChain, Multi-Agent Systems, RAG, Prompt Engineering
LLMs & APIs: OpenAI API, Gemini API, Groq, Ollama
Vector Search & Databases: ChromaDB, FAISS, PostgreSQL, Vector Databases
Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, CNNs, Feature Engineering
Backend & Deployment: FastAPI, REST APIs, Authentication & Authorization, JWT, Docker, CI/CD
Development & Tools: Git, Pandas, NumPy

Projects

Nyaya Saathi — AI Legal Accessibility Platform
LangGraph, FastAPI, ChromaDB, Groq (Llama 3.3 70B + Vision), Supabase, Twilio

- Built a 7-feature multilingual agentic AI legal platform for FIR explanation, rights guidance, document drafting, bail eligibility, legal aid matching, and hearing reminders using LangGraph, FastAPI, and Groq LLMs.
- Designed a 7-agent RAG architecture using LangGraph and ChromaDB to ground legal responses in BNS, BNSS, IPC, and Constitutional provisions.
- Built an FIR image-to-bail pipeline using Groq Vision OCR and Section 479 BNSS eligibility logic to generate structured legal-document PDFs in under 90 seconds; supports 10 Indian languages and deploys as a PWA.

Enterprise Knowledge AI – Multi-Tenant RAG Platform
Python, FastAPI, PostgreSQL, FAISS, Ollama, OpenAI

- Built a multi-tenant RAG platform using FastAPI and PostgreSQL for semantic search and intelligent querying over enterprise documents.
- Designed document ingestion pipelines with chunking, embedding generation, and FAISS-based vector indexing for efficient semantic retrieval.
- Integrated Ollama and OpenAI models for citation-aware responses, with REST APIs for real-time querying and persistent chat sessions.

AnnadataAI: AI-Powered Farming Assistant
Python, Machine Learning, Random Forest, FastAPI, Streamlit

- Built an AI-powered farming assistant using Random Forest to recommend crops based on soil NPK values, pH levels, and weather conditions.
- Developed preprocessing and feature engineering pipelines to improve agricultural prediction reliability.
- Deployed a FastAPI backend and Streamlit dashboard for crop recommendations, irrigation planning, and yield estimation.
